Beauty, Health & Fitness

Are you suffering from chronic severe itch, with bumps on the skin?

Right now, we are enrolling participants in a medical research study of an investigational oral medication for people with severe itching from Prurigo Nodularis.

Prurigo Nodularis is a disease with a cycle of scratching, bleeding, and bumps forming on the skin. The itch is so strong it can affect the quality of sleep and even work and social life.

TO QUALIFY, PARTICIPANTS MUST:

- Be adults with severe itching from Prurigo Nodularis
- Have 10 or more itchy nodules (bumps) involving at least 2 parts of the body.

There is no cost to participate, and compensation for travel and other expenses may be available.

To see if you qualify to join our study, please contact us today.
